

THE WAY OUR SOCIETY IS BUILDING CAN'T LAST FOREVER

SO LET'S NOT PRETEND ANYMORE

*Humans have been coming together to build sustainable structures for millions of years. **It's time to start again to build a better world!***

ThePOOSH.org is a web platform that hosts sustainable self-build projects. Volunteers can find these projects and contribute by sharing skills, knowledge and labour. Our mission is to inspire and empower people to build economical, sustainable, and community created structures by creating an international network of skilled and unskilled volunteers that exchange knowledge, labor, and experiences at sustainable self-build projects!

The end result: more sustainable structures on this planet. It's simple. We can change this world with a movement... a movement armed with hammers, skills and a vision. JOIN US.
